bagzatsoftware.ca

Custom web software and automation for Ontario municipalities and public agencies

An Ontario firm building web apps, workflow automations and internal tools for public-sector teams, delivered by a developer with 20+ years of software experience.

CORE COMPETENCIES

01 **Custom web applications.** Secure, database-backed apps with accounts, roles and dashboards.

02 **Workflow automation.** Automated approvals, notifications, reports and data entry.

03 **Online services and forms.** Permits, registrations and bookings that replace paper workflows.

04 **Website modernization.** Rebuilds of dated sites, built to WCAG 2.1 AA for AODA compliance.

05 **Payments and integrations.** Online fee collection and API connections to existing systems.

06 **Maintenance and support.** Hosting, updates, security patching and post-launch fixes.

SELECTED WORK

Invoicium · invoicium.ca

Invoicing SaaS for Canadian trades. Designed, built and operate it end to end: accounts, invoicing and Stripe payments. Founder and sole developer.

DIFFERENTIATORS

Direct line to the developer. No handoffs.

Canadian hosting. Data stays in Canadian regions.

Right-sized. Fixed-price quotes for small procurements.
